DATA BACKUP

Overview

Data loss is one of the big fears of the technology age. With your home computer having data including your personal finances, work, appointments, family photographs and more, losing your data can be a frightening prospect.

The results of data loss can be devastating – but it doesn't have to be a catastrophe. By backing up your most important files you can protect yourself against the problems associated with data loss.

Spending some time to protect against your hard drive failing is time well spent.

At the M.IT solutions your information will be securely preserved in the comfort of your home. Allowing you to spend your time enjoying yourself while we back up all your data, in the form of CD or DVD or on request USB Memory stick storage media which you can keep safe.

Service	Ultra lite	Lite	Standard	Premium	
Maximum backup	up to 1GB	up to 2GB	up to 8GB	up to 120 GB up to 120 GB

DATA TRANSFER

Overview

Getting a spanking new PC to replace a previous one is always exciting. But, the most daunting thing you'll ever have to do with your PC is moving your files and folders to the brand new one! The thought of transferring all that information to your new PC can take some of the shine of that sparkling new piece of kit. After all, you want to play with your new PC – not sit copying files. At M.IT solutions we know how to move your data quickly and securely. We'll transfer your files and folders to your new PC for you in the comfort of your home if you wish. At the same time we can provide you with a backup of all your files should you lose the data off your PC in the future? Check out our Data Backup service for more information.

How does it work?

The M.IT provide a full data transfer service where we'll take care of all the boring work for you:

~ We'll move your files and settings from your old computer to your new one.

Standard charge of £25 for data transfer. Capped to 40GB

For each additional 5GB above capped rate add £5 to standard charge.

DATA WIPE

Overview

When you've bought a new PC, disposing of your old PC can become an issue. Do you pass it to a family member, sell it on eBay or donate it to the local primary school raffle?

If you are planning on passing your computer to anyone once you have finished with it, you should consider data cleansing a necessity. Reformatting your hard drive is not enough to protect against identity theft or to prevent confidential documents being extracted. With just a few simple pieces of information, someone could get a passport, a mortgage, personal credit or a driving license in your name.

M.IT solutions Data Cleanse service will remove all the data from your PC, allowing it to be disposed of safely or passed on to someone else without the worry of your data being recovered later by unscrupulous individuals. We use government standards to ensure the destruction of your data is to a secure level.

Standard charge of £15. its done.

COMPUTER HEALTH CHECK AND CLEANUP

Every computer needs regular maintenance to keep it running at its best. Over time unused files build up on your hard drive, adding and removing software leaves behind a messy hard drive and dust builds up inside the PC case. All these factors reduce the efficiency of your computer – meaning you don't get the performance you'd expect. To keep your computer in shape, here at MIT solutions we recommend you have a PC Health Check once a year. We can even come to your house if required, and carry out the full health check in your home. Similar to a car service and MOT – our Health Check focuses on a number of critical areas:

Your cookies and temporary internet files.

Redundant and rarely used application.

Duplicate files on your computer e.g. same song placed in different folders across your hard drive.

A cleanup of dust build up across your motherboard, and heat sink fans cleanup.

Basic charge pick up and drop off.£40

Home charge £50

MEMORY INSTALLATION

Memory is a crucial part of any home PC and it comes in many different shapes, speeds and sizes depending on the PC that you own. This makes memory specific to a PC and there is no one size fits all solution for PC memory. Often the more memory your PC has the better it is able to perform.

PC memory also requires effective installation – removing the cover for your PC and interacting with the internal components for the machine. At MIT solutions we take the hassle out of this process by finding the correct memory and installing it for you.

The cost will be standard £25 for the installation plus the cost of the memory itself.

MISCELLANEOUS JOBS

Standard £25 per hour and discounts available for pickup and return.

LESSONS AT HOME

Also for those who are frustrated with having to rely on others to show you how its done I carryout 1-on-1 Lessons for those willing to expand their knowledge.
